Professional Summary

Experienced Senior Frontend Engineer with 7+ years of professional software experience, specializing in building efficient and scalable web applications. Skilled in TypeScript, Svelte, Angular, Cypress, Jest, and React.js. Dedicated to creating functional and attractive applications while ensuring a clean user experience. Strong problem-solving abilities, excellent communication skills, and a positive attitude towards teamwork.

Employment History

Senior Frontend Engineer, CEFALO, Dhaka

10/2022 - Present

As a Senior Software Engineer, the primary responsibilities for this position include:

- Develop and support software including applications, database integration, interfaces, and new functionality enhancements
- Understand complex business and functional requirements and provide direction in technical specifications and product requirements.
- Lead technical design and code reviews for all new enhancements and work delivered; can sign off on small features
- Support test and deployment of new products and features.
- Perform other duties as assigned.

Senior Frontend Developer, ReformedTech, Dhaka

06/2021 - 09/2022

As a Senior Front End Developer, the primary responsibilities for this position include:

- Build modern client-side web applications using cutting edge technologies.
- Work seamlessly with the rest of the development team (e.g. back-end & front-end developers).
- Work in an agile environment and Iterate quickly based on customer and internal feedback.
- Participating in design discussions, helping to decide company's best ways of building new features
- Mentor others in my areas of expertise.

Software Developer, Unolo Technology Limited, Dhaka

03/2019 - 05/2021

As a Software Developer, the primary responsibilities for this position include:

- As a full-stack software developer my responsibilities are Design, build, and maintain efficient, reusable, and reliable Java code for back-end and Angular code for front-end. Ensure the best possible performance, quality, and responsiveness of the applications. Identify bottlenecks and bugs, and devise solutions to these problems. Help maintain code quality, organisation, and automation.
- Analyzed systems flow, data usage, and work processes; investigated 100% of problem areas
- Developed and executed 200+ test procedures for software components
- Developed code following common security practices and development design patterns
- Analyzed 30+ user requirements to derive technical software design and performance requirements

Software Developer, Monerbari Technology Limited, Dhaka

02/2017 - 01/2019

As a software developer, my main tasks are developing and implementing feature requirements for the Angular, REST API architecture, testing and debug backend.

Lecturer (PT), United International University, Dhaka

09/2014 - 01/2017

As a lecturer, I have attended structured programming language courses (Theory and Laboratory).

Education

Master of Science in Information Technology, University of Stuttgart, Stuttgart, Germany

10/2010 - 05/2013

Specialization in embedded Systems. Also, known Industrial Automation, Distributed Programming.

Bachelor of Science in Electrical and Electronics Engineering (EEE), United International University, Dhaka

06/2006 - 09/2009

Major: Electronics
